

## 22 BOCCHETTONE ETERNO IN GOMMA EPDM CON CODOLO H 200 mm

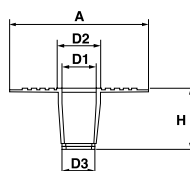

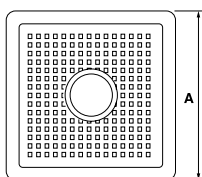

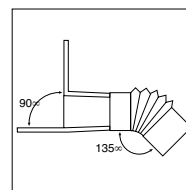

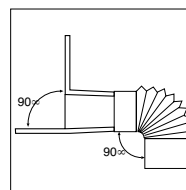

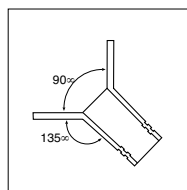

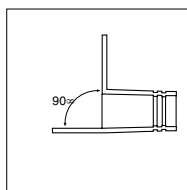

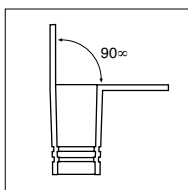

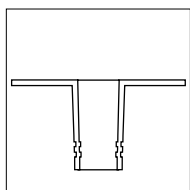

### ETERNO EPDM RUBBER ROOF DRAIN WITH A 200 mm SPIGOT

Applicazione  
a fiamma  
Torch-on  
application

Interamente prodotto in gomma EPDM, è il primo, storico bocchettone di scarico inventato da ETERNO IVICA. Invariate nel tempo le intaccature a coda di rondine sulla flangia per una perfetta adesione al manto bituminoso ed il codolo cilindrico per una perfetta tenuta al pluviale di scarico.

Entirely manufactured in EPDM rubber, it is the very first historical roof drain invented by ETERNO IVICA. The exclusive dove-tail notches on the flange for a perfect bond to any bituminous membrane and the cylindrical spigot are still the same.
